OKLAHOMA CITY

WWW.OSUOKC.EDU

The U.S. leads the world in plant production. Students attending OSU-OKC have access to plant production courses that train them to propagate, grow-on, finish and market plants and related products at both the wholesale and retail levels. Students gain valuable experience working with crops in a 16,000 square-foot ridge-and-furrow greenhouse facility, as well as a 3,000 square-foot Quonset-style greenhouse.

Students also experience various methods of plant production, including container and field production systems, providing a valuable understanding of each method's advantages and limitations. Graduates from this emphasis may work for established plant production companies or start their own businesses.

DEGREES OFFERED:

Associate in Applied Science

- **Horticulture Technology**
 - Horticulture Therapy Emphasis
 - Landscape Contracting Emphasis
 - Landscape Design Emphasis
