

Public Service A.S.

Program Description

An Associate of Science degree in Public Service prepares students for entry-level administrative jobs in government or nonprofit organizations or for transfer to four-year institutions.

Employment Information

The program gives students an overview of public service, the laws governing public and/or nonprofit organizations and the financial and budgeting principles that distinguish public sector accounting practices from private enterprise. In addition, students learn the dynamics of working and negotiating constructively with employee and public interest groups and examine hot-button issues that administrators must be prepared to face in the increasingly competitive public sector. Students learn computer database and word processing skills essential for administrators in today's lean public/nonprofit organizations and have the option of gaining firsthand administrative experience through internships with area organizations or agencies.

Degree Awarded

Associate in Applied Science
