Dear Applicant:

Thank you for expressing an interest in the Veterinary Technology Program at Oklahoma State University-Oklahoma City. The information below outlines the application process. After reading this and the other enclosed information, if you have any questions please contact me at (405) 945-3364 or flinda@osuokc.edu; or Dana Call, RVT at (405) 945-9114 or calld@osuokc.edu.

- Each summer, applicants are chosen by the Vet. Tech. Selection Committee to enter the OSU-OKC Vet. Tech. Program in the fall. Applications will be considered in the order they are received.

- Applicant selection is based solely on the criteria listed on the enclosed “Score Sheet”. The top scoring eligible applicants are invited to enter the program.

- Class sizes may be limited. Not all eligible applicants are guaranteed admission.

- All first-semester Vet. Tech. students must be eligible to begin college level courses with an ACT score of at least 19 in Math, Science and Reading.

- The ACT or SAT score is an important component of the scoring process as well as a requirement for admission to the Vet. Tech. Program. If you took the ACT while in High School, your ACT scores should be on your HS transcript. You must submit an ACT or SAT score with your application. [We will accept “residual” ACT scores. The residual ACT exam is given several times throughout the year at most college campuses. Check with a local college if you need to take the ACT.]

- The enclosure entitled “Veterinary Technology” provides a program description and list of required coursework.

- If you are not already enrolled at OSU-OKC, please be sure to fill out and submit the enclosed “Application for Admission” to OSU-OKC.

- Applicants who require financial aid should contact the OSU-OKC Financial Aid Office at (405) 945-8646. Scholarship information is also available at www.osuokc.edu/apply/aboutschol.htm.

Please mail all required documents directly to the Vet. Tech. Department. The address is on the top of the VT Application.

Sincerely,

Sally Henderson, DVM
Department Head, Veterinary Technology
